

Cybersecurity Grant Program

Our Business: Making Your Business Easier

Utopian Help PBC is a managed business services provider focused on small business owners, entrepreneurs and their employees. As a public benefit corporation, Utopian Help is dedicated to empowering small business owners.

Over 40% of small businesses are expected to experience a cybersecurity breach this year. Of those that experience breach, 20% are expected to cease operation within 1 year due to the breach. To help address this crisis, we are adding cybersecurity grants to our public mission. Our public benefit cybersecurity grant covers 50% of the monthly costs associated with our managed cybersecurity offering and 100% of the setup costs.

Inclusive Managed Cybersecurity

Utopian Help PBC's managed cybersecurity service offers organizations a robust solution for safeguarding their IT infrastructure through a fixed monthly fee model. Our inclusive approach starts by helping your organization through implementing cybersecurity best practices, identifying and closing security gaps, and developing policies to ensure regulatory compliance. In parallel, we implement our includes 24/7 security monitoring that detects threats in real-time, provides proactive threat intelligence and analysis, and implement an incident response plan for swift action during security incidents. Based on your compliance requirements, Utopian Help provides regular vulnerability management assessments, compliance assistance with regulations like CMMC, PCI DSS, and HIPAA, and security awareness training for employees.

Service Components	Description
Implement Security Best Practices	Perform implementation of cybersecurity best practices across all technology resources of the organization.
Identify and Close Security Gaps	Perform gap and needs analysis across the entire organization, including software, hardware, and personnel to identify cybersecurity gaps and close through, whether through configuration changes, employee training, or enhanced security implementations.
Cybersecurity Policy Development	Development and implementation of cybersecurity policies to align with target regulatory frameworks.
24x7 Security Operation Center	Our SOC continuously monitors all of your company's network, endpoints, mobile devices, and applications to detect and respond to potential threats in real-time.
Threat Intelligence and Analysis	Proactive identification and analysis of emerging threats, using advanced tools and methodologies to protect the organization before threats can impact operations.
Incident Response	We work with you to customize a response plan based on industry best practices to respond to security incidents, enabling swift action to mitigate damage and recover from breaches.
Vulnerability Management	Regular scanning and assessment of the organization's systems and applications to identify and support remediating vulnerabilities.
Compliance Management	Assistance with meeting regulatory requirements and industry standards, such as GDPR, HIPAA, or PCI-DSS.
Security Awareness Training	We provide education to employees on best practices for cybersecurity and how to recognize potential threats like phishing attacks.
Access Control Auditing	We help you ensure that only authorized individuals have access to sensitive data and systems. We assist you with reviewing user roles on a regular basis and reviewing information access patterns for potential concerns.
Reporting and Analytics	We provide regular reports that provide insights into the organization's security posture, detailing threats detected, actions taken, and suggestions for enhancing security.

Managed Cybersecurity Pricing

Contract Component	Description	Unit Price	Qty	Ext. Price
Comprehensive Endpoint Protection and Monitoring	Comprehensive Endpoint Protection and Monitoring Service that automatically prevents, detects, investigates, and responds to threats across your environment. Priced per protected device.	\$30.00 per Endpoint		
Security Monitoring and Incident Response	24x7 Security Monitoring and incident response utilizing our security operation center. This includes support for remediating any successful cybersecurity breach.	\$31.25 per User		
Monthly Security Posture & Vulnerability Management	Our monthly security posture and vulnerability management process provides a detailed evaluation of each device's security status within a network. It includes device specifics like type, usage, and security events, alongside detected vulnerabilities categorized by severity. We then assist your technology provider with ensuring the issues are remediated.	\$31.25 per Endpoint		
Semi-Annual Security Awareness Training	Semi-Annual Security Awareness Training program equips employees with essential knowledge about current cyber threats, including phishing and ransomware, while promoting best practices for cyber hygiene, such as password management and data protection. The training includes clear incident reporting procedures, compliance requirements, and interactive scenarios to engage participants and assess their understanding.	\$10.50 per User		
Quarterly Security Reporting & Access Control Review	Quarterly Security Reporting and Access Control Review delivers an in-depth analysis of an organization's security posture, focusing on key metrics such as incident trends, compliance status, and vulnerability assessments. This service includes a comprehensive review of access control measures, evaluating user permissions and identifying any potential security gaps.	\$15.75 per User		
Annual Cybersecurity Compliance Support	Annual Cybersecurity Compliance Support service guides your organization through the steps necessary to meet regulatory compliance requirements by conducting comprehensive assessments of their cybersecurity practices against relevant standards, such as GDPR, HIPAA, or PCI-DSS. This service includes evaluating existing policies, identifying gaps, utilizes template documentation to eliminate documentation gaps, and providing actionable recommendations to enhance security measures.	\$200.00 per Compliance Standard		
Pre-Grant Managed Cybersecurity Monthly Cost				

All per user and per device costs are adjusted in the calendar month following a change in the covered quantity. Adding an additional compliance standard will be retroactive to the start of the current annual term; all missed payments will be charged as part of the next billing cycle to initiate the addition. If your account is pre-paid, added devices will be co-terminated to the end of the annual agreement and will receive the same discount if the remainder of the term is prepaid as well, otherwise, regular pricing will be applied and billed monthly following the change. On pre-paid plans, device and user counts may not be reduced until the end of the contract term.

What is a Public Benefit Corporation?

A Public Benefit Corporation (PBC) is a type of for-profit corporation that includes a specific public benefit purpose in its corporate charter, in addition to the traditional goal of maximizing shareholder profits. This legal structure allows the company to consider the impact of its decisions on society, the environment, and other stakeholders, balancing financial returns with broader societal responsibilities.
